

## Our Services.....

### Catering to the Design and Construction Industries

The Architectural Alliance Group provides a unique and unlimited list of capabilities due to our vast corporate networking. Within our alliance are companies of all sizes and disciplines. When it comes to our business, we offer our clients a powerful resource and a recipe for success. Listed below is a list of services we offer our clients.

### Alternative Dispute Resolution

The Architectural Alliance Group offers various Alternative Dispute Resolution services including **Mediation**, **Neutral Services** and **Job-Site Resolution**.

(Reference Alternative Dispute Resolution pages for more information)

### Expert Witness and Litigation Support Services

In addition to the various ADR services offered by The Architectural Alliance Group, AAG provides expert witness and litigation services as is often necessary during the traditional litigation process.

(Reference Expert Witness and Litigation Support Services pages for more information)

### Forensics

Forensic Architecture includes the investigation and analysis of existing structures. Forensic applications in buildings are typically implemented due to varying degrees of damage and or failures to building components.

(Reference Forensics pages for more information)

### Risk Management

The Architectural Alliance Group offers risk management consulting services regarding the mitigation of design and construction related defects. These services generally include *peer review of construction documents, building code and accessibility analysis, contract review, construction observations, forensic architecture and construction defect analysis*.

(Reference Risk Management pages for more information)

## Owner Representation

Owner Representation for project development is vital in maintaining established project schedules and budgets. Although the role of Owner's Representative has been traditionally played by the Architect-of-Record on the project, it has become more and more common for the owner to retain a third party consultant to assist throughout the development process.
